

# What type of AI research are you most interested in hearing about at our events, workshops and webinars?

# What webinar content are you most interested in?

# When would be the best time of year to run our annual conference?

# When would be the best time of year to run our larger funding calls?

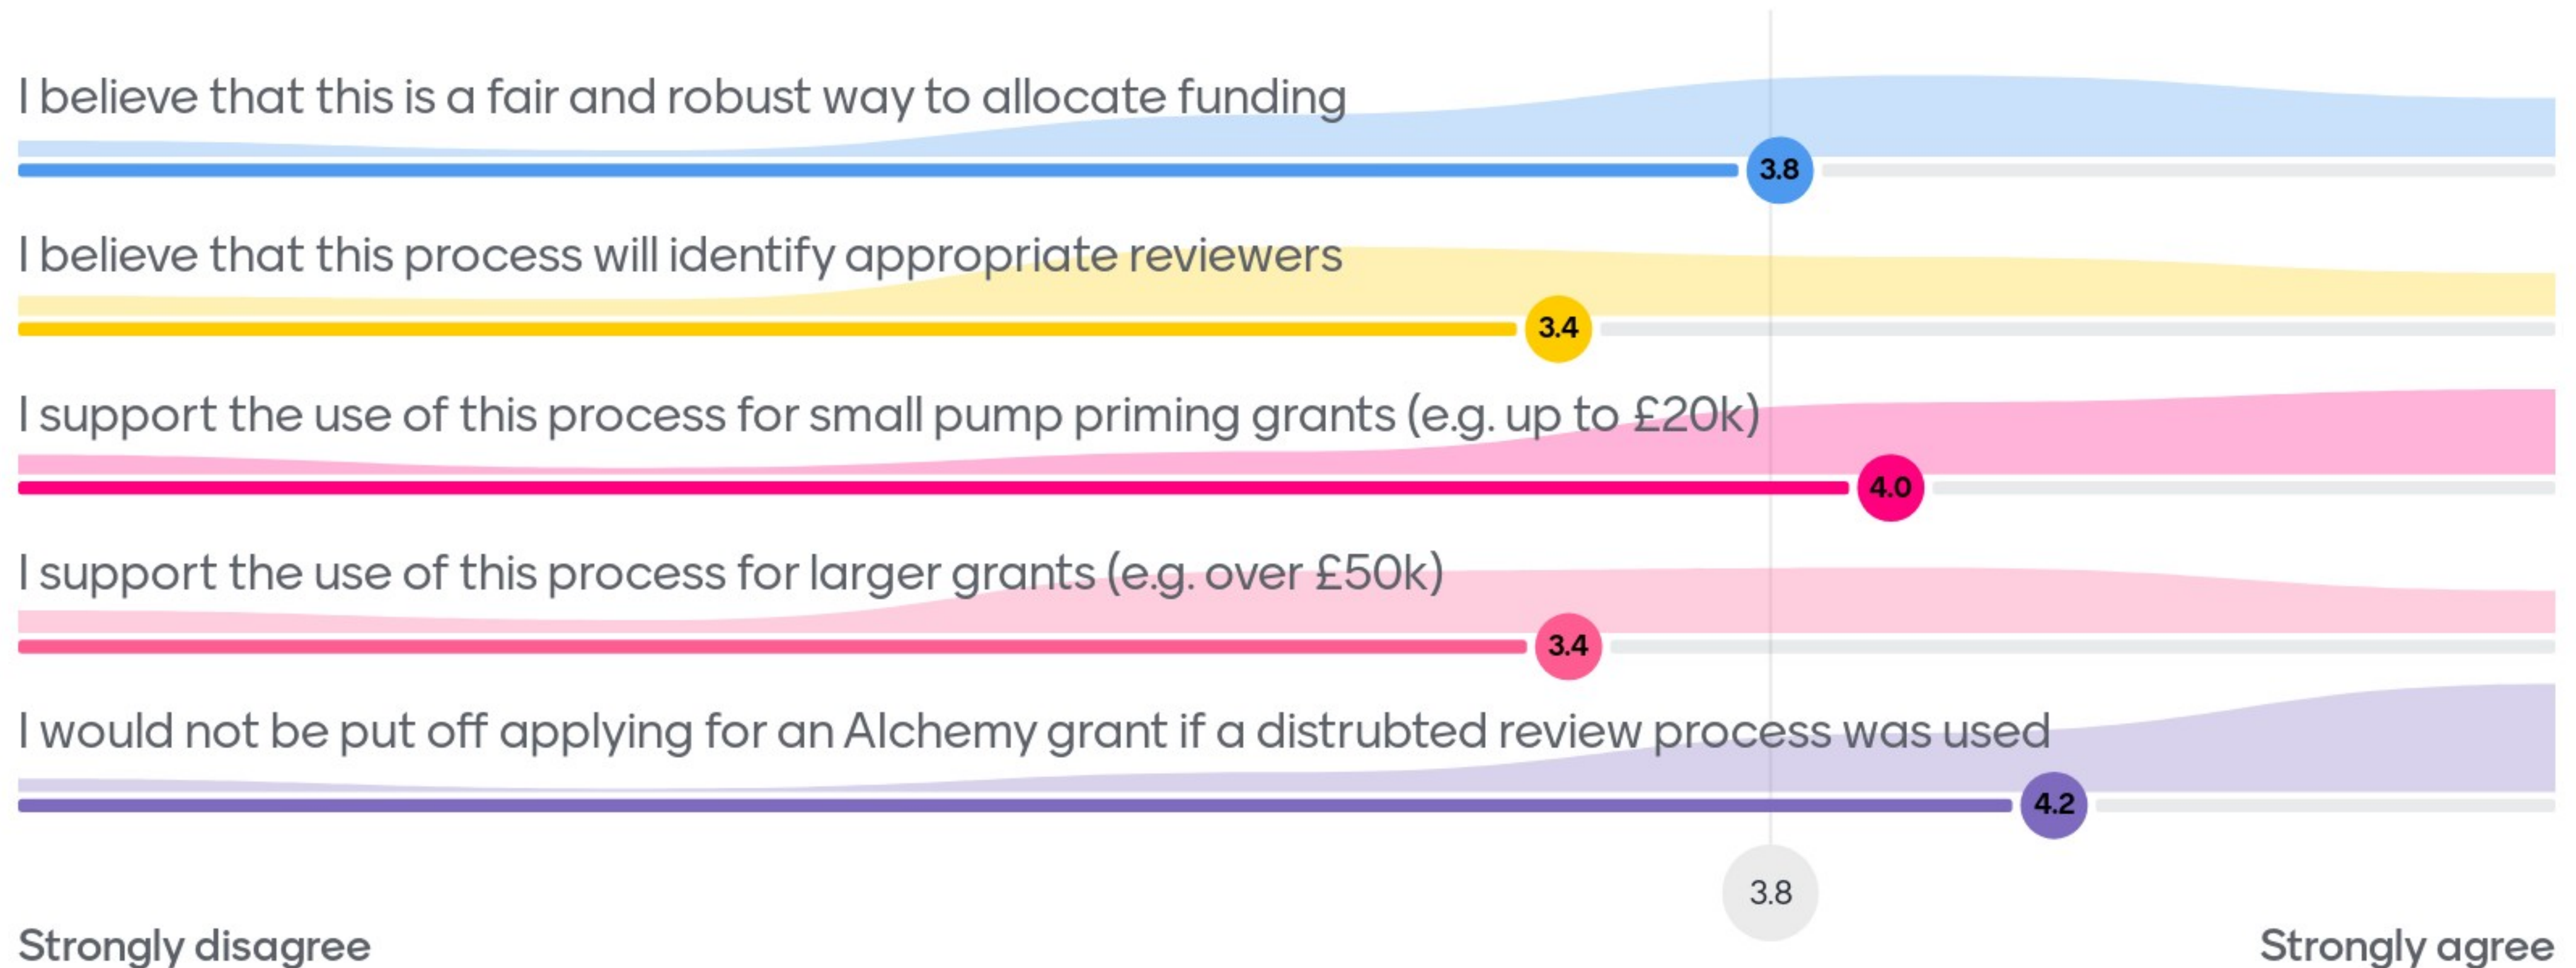

# Which topics do you think we should cover in our workshops?

# What are your views on the use of a distributed peer review process?

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

Training for industry

Cooperations

training courses

Training

Help set up collaborative research

Connection to industrial partners

summer internships

Training courses

2

52

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

Open engagement with researchers not in the hub

Connections with industry

Collaborations

training for students.

Developing new ML/AI tools for industry

Collaborations

Opportunities for PAID consultancy/ projects

Database

2

52

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

Workshops to help identify relevant topics and useful research areas

Training

Coding training

new collaboration meet-ups

enabling sharing of code and data

training courses

Cross-institution collaborations

open source data

2

52

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

A source for open,  
permissively licensed  
datasets

best practises --->  
leading to  
standardisation of  
processes

Training for industry

Data creation and  
sharing

Updates on industry  
engagement  
opportunities

Opportunities to collaborate  
in big, internationally leading  
cross-sector projects

workshops and training

Newcomer to AI so  
training

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

training for industry

AI training

Understand the pitfalls of  
AI and develop  
foundations

Case studies  
Good Software  
packages  
Access to data

training for students

Developing best practice

Best practises

Show clear benefit of Hub  
vs individual academic or  
institute

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

share details of academics involved in the hub, areas of expertise and current projects to help with industrial links

matchmaking/networking events

Website with list of upcoming events/opportunities

Example workflows

establishing community-led benchmarks

AI tools

Accelerate adoption of AI/ML and automation for soft matter and complex fluid systems

engagement with experts in the frontiers of AI

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

Collaborations with AI experts.

validation and verification of AI algorithms

Case studies 12 months from now

collaborations

Training courses with small project

Brokerage links between academia and industry

workshops, networking events

collaborations

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

Standardisation and best practice

Job

Access to experimental facilities

Funding opportunities for moving to independent research

coordinate grant applications for further funding

Working with people I haven't worked with before

opportunity to engage with experimentalists trying to use AI

Agile response to new developments

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

Open source data (sharing materials science data to improve training of existing models and extend them to larger systems)

events to co-create research questions

Access to automated characterisation

usability of AI tools for different domain experts user vs developer

Assistance for successful approaches to translate AI solutions into an industrial setting.

To understand clearly how to use AI for scaling computational chemistry outputs to usable materials in industrial applications

Accessible network of researchers and know who has expertise in which equipment

coding training

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

Infrastructure

Training in data handling, storage, and utilisation.

Open datasets

ensuring responsible use of AI in chemistry

Build and host a library of examples / tutorials

Involving the v forefront of industry AI

Development of new collaborations

alignment with other international Hubs in the future

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

lobbying funders to ensure we have the necessary hardware

Build links between experimentalists and AI researchers

Global networking opportunities and showcasing state of the art

Non-dilutive funding for Alchemy start-ups

How coding is implemented in automation

Access to large exit datasets - they are v rare!!

Support for PDRA willing to transition to PI

develop good practice for responsible innovation

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

Knowledge sharing opportunities

creation of new job-specs, what skills does an AI Chemist need?

Training for handling metadata and adopting FAIR principles - best practice

Communication channel between industry and academics

Very important UK leadership role in AI and data standards etc - not just a slush fund for academic projects

creation of a FAIR data hub

develop ideas for new undergrad courses

Lobbying funders to get access to proper equipment to train on

# What could the Hub do going forward that would be most beneficial to you? How would you like to engage with the Hub?

advocate for AI/ML in chemistry curricula and accreditation criteria

funding for research

Opportunity for short secondments between academic and industrial partners for learning, development, and sharing of perspective.

Broad participation creation (start as a wiki or similar) of a program wide review article of the area.
